Applicant: Hiroaki FUJII et al.
Title: SEAT BELT DEVICE
Appl. No.: 10/718,543
Filing Date: 11/24/2003
Examiner: George D. Spisich
Art Unit: 3616
Confirmation Number: 1813

PRE-APPEAL BRIEF REQUEST FOR REVIEW

Mail Stop AF
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

In accordance with the Pre-Appeal Brief Conference Pilot Program, announced July 11, 2005, this Pre-Appeal Brief Request is being filed together with a Notice of Appeal.

REMARKS

The Examiner has indicated that the Amendment filed June 7, 2007 will be entered for the purposes of appeal. (See Advisory Action mailed June 25, 2007). Thus, consideration of claims 1-4 and 6-7 is requested.

Claim 1 is provisionally rejected as being unpatentable over claims 1, 5, 6, and 10-12 of co-pending U.S. Patent Application No. 10/873,129. No action is required until either the current application or co-pending U.S. Patent Application No. 10/873,129 is allowed.

Prior Art Rejection

Claims 1, 3, 4, and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 4,667,980 (“Yamamoto”) in view of U.S. Patent No. 4,667,980 (“Aoki”). The rejection should be withdrawn at least because the references (alone or in combination) fail to disclose, teach or suggest the claimed recitations.

Claim 1 calls for a seat belt device that comprises, among other things, “a hitch member [that] is attached to either one of said vehicle seat fixed to the vehicle body or said seat weight sensor fixed to the vehicle body, the hitch member being immovable.” Claim 4 calls for a seat belt device that comprises, among other things, a hitch member that “comprises an immovable slide bar.” Yamamoto and Aoki, taken together or separately, fail to disclose, teach, or suggest such a seat belt device as called for by claims 1 and 4.

According to the Examiner, Yamamoto discloses an immovable hitch member (40). The Examiner contends that the hitch member of Yamamoto is “immovable” since the hitch member is immovably attached to the seat and is immovable with respect to the seat. (Office Action at pp. 5 and 7).

However, element 40 refers to a movable guide rail. The guide rail (40), “is made movable on a slide base 80 by a bracket 78.” (Yamamoto at col. 3, lines 7-14). Figure 5 of Yamamoto illustrates the guide rail (40) moving. The term “immovable” is defined as “impossible to move” and “incapable of movement.” (The American Heritage® Dictionary of the English Language: Fourth Edition (2000)). Thus, if the guide rail (40) of Yamamoto is capable of movement, then the guide rail cannot be “immovable.” Aoki fails to cure the deficiencies of Yamamoto. Thus, the rejection is improper. Reconsideration and withdrawal of the rejection is respectfully requested.

Claims 3, 6, and 7 depend from claim 1 or claim 4 and are allowable therewith, for at least the reasons set forth above, without regard to the further patentable subject matter set forth in these dependent claims.

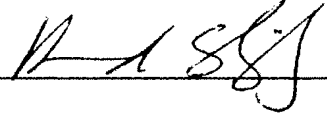

Serial No. 10/718,543

Atty. Dkt. No. 086142-0600

In view of the foregoing, it is respectfully submitted that the application is in condition for allowance.

Respectfully submitted,

Date 7/6/2007
